Fitness,

Weightloss

Healthy skin

Content: 100% Natural organic dried Moringa Oleifera leaves

---

All high concentrated natural Moringa Nutrients have a high biological value and are easily absorbed by our body helping him to get energized, fit and healthy.

## Moringa Oleifera

When you start to study about super foods and which plants have a very high content of nutrient covering a big variety of nutrients, you will soon find one of the few power plants, which covers all of this, and this plant is Moringa Oleifera. We at Veggie Style love Moringa, as it is one natural multi mineral/vitamin and protein super plant. And in India and Africa it is even used as such – in order to prevent malnutrition in Africa, they mix into their foods fresh Moringa Leafs this guarantees a complete nutrition including all essential amino acids, vitamins, minerals and other valuable nutrients.

And Moringa offers in very dry areas of the world a big advantage: It is a tree, which grows very well in dry areas which gives the advantage of delivering a easy grooving complete nutrition source in areas where many plants don't have the chance to grow.

The power of Moringa is proven by one simply fact without the need of studying the nutritional content of Moringa: In cases of child malnutrition, whenever Moringa was added to the meals, all symptoms of malnutrition disappeared, as Moringa contains nearly everything the body needs in order to grow and stay healthy.

So Based on this Moringa should be on a daily basis an ingredient in any athletes diet, as it is a completely natural multi nutrition ingredient. Our Moringa Trees grow naturally and the only process we do to our plants is to cut the leaves every 6 weeks, dry them and cut them into powder, so that it is easy to consume by adding it to the meals or in our Veggie Style Moringa Veggie capsules.
